NFS *Aloha Insight*

Looking for an application that helps you analyse operational data?

Increase the visibility and control of your operations — anywhere, anytime

Restaurant operators need centralised hosted applications to efficiently analyse operational data and automatically alert management to issues that require attention.

Aloha Insight is a web-based application that collects sales and employee data at the restaurant and makes it available via the Intranet and through distributed reports. This powerful tool provides critical capabilities to your business such as drill down viewer options for fast, high-level to granular examination of data, real-time reporting and data replication for local data warehousing and exports to accounting, payroll and HR systems.

- *Grow revenue –* *Measure operational performance accurately to make smart business decisions quickly.*

- *Increase visibility and control –* *Manage real-time critical data across all sites and implement new database changes in a single site or multiple sites.*

- *Reduce operational costs –* *Measure, control and reduce food costs by highlighting variances and forecast labor scheduling to maximise employee productivity.*

- *Improve customer service –* *Spend less time on administration and more time serving customers and improving employee satisfaction.*

- *Customise your data –* *Consolidate and customise multi-store reporting with extensive drill down analysis by site, region or concept.*
