

NFS Aloha Pulse Real-Time

NFS launches new technology that puts your restaurant in the palm of your hand

NFS Technology Group launch *Pulse Real-Time*, a mobile platform that gives restaurateurs the opportunity to view and interact with data in a fresh and exciting new way.

Pulse Real-Time turns data collected from the restaurant EPOS software into actionable information, delivered in real time direct to a user's smart phone, allowing restaurant owners to immediately make decisions that directly impact on the bottom line.

Gone are the days of waiting for cumbersome reports to be generated at the end of the day. Up-to-the minute business intelligence delivered by *Pulse Real-Time* includes:

- *Net sales by hour, day part, category and order mode*
- *Staff costs and percentage by job code*
- *Comps and voids*
- *Employee performance*
- *Payment details*
- *Social media account monitoring*
- *And much more...*

technology group

Pulse Real-Time is part of the Aloha suite of software

This best of breed EPOS solution builds stock control, labour management, loyalty and gift cards, head office management and table reservations into one integrated package. Clients already putting it to best effect include Whyte & Brown, London's latest casual dining experience; Shaka Zulu, London's largest South African restaurant and nightclub, and KFC.
