

Rendezvous Mobile

Multi platform Mobile Booking App

A survey in Workplace Insight reports that 86% of workers would change jobs to accommodate their preferences for agile working!

This means companies must:

- Have a flexible working plan in place to attract and retain top talent
- Streamline key services such as the booking of meeting rooms / desks
- Introduce mobile solutions to support a more agile workforce.

THE SOLUTION? The Rendezvous Mobile

Supporting Agile Working

It is recognised today that the workplace of the future will bring together innovative design concepts as well as the latest technology, to promote greater productivity and effective collaboration. Mobility solutions will be a key element of the technology mix.

The Rendezvous mobile solution-set, comprising of QuickBook, our HTML 5 based platform and a range of mobile Apps will support our clients on the journey into a more agile workplace. Our **new generation of multiplatform mobile Apps** offer the user a great experience to locate and book the right space from anywhere.

Whichever smart device you use (**iOS** or **Android**), our user-friendly Apps support QR/Bar code scanning for easy check-in/checkout-out functionality. In conjunction with sensor technology and way finding, our Apps platform will deliver a seamless user experience and cost effective functionality for tracking the utilisation of space.
